Kshitij Mathur

mathur.kshitij08@gmail.com | linkedin.com/in/KshitijMathur08 | github.com/Kmathur08 | leetcode.com/u/kmathur08

Education

Swami Keshvanand Institute of Technology (SKIT) Jaipur, Rajasthan
B.Tech in Computer Science — CGPA: 9.0 *Sep 2023 – May 2027*
Coding Profiles: 417 solved on LeetCode (800 across all platforms) | CodeChef | GeeksforGeeks

Technical Skills

Primary Stack: Next.js, React, TypeScript, Node.js, Express.js, MongoDB, Firebase (Auth + Firestore)
AI / APIs: Google Gemini API, Vapi AI (voice), LLM prompt engineering, REST API design
Languages: JavaScript, TypeScript, C++, Java (DSA), HTML, CSS
Tools: Git, GitHub, VS Code, Postman, Vercel
Concepts: Data Structures & Algorithms, OOP, RESTful APIs, JWT Authentication, Session Management

Experience

Gen AI Intern May 2026 - July 2026
Malaviya National Institute of Technology (MNIT) *Jaipur, Rajasthan*

- Built a hybrid candidate-ranking pipeline in a 4-member team for the RedRob AI Hackathon — combining semantic (Sentence-Transformers), lexical (TF-IDF), structured, and behavioral scoring to rank candidates against a job description.
- Implemented honeypot detection (MinHash-LSH duplicate clustering, multi-stage quality checks) and cross-encoder reranking, delivering a top-100 shortlist with automated, explainable reasoning per candidate.

Front-end Intern Jun 2025 – Jul 2025
PRNIT India LLP *Jaipur, Rajasthan*

- Developed 10+ reusable React + Tailwind CSS components across 2 core product modules, standardising UI patterns and eliminating duplicate styling throughout the codebase.
- Delivered 2 client-facing feature enhancements within a 2-person sprint team — both shipped on schedule with zero scope rollback following client review.
- Optimised layouts for mobile-first responsiveness, verifying cross-browser compatibility across Chrome, Firefox, and Safari on 3 screen breakpoints to resolve rendering inconsistencies.

Web Development Intern Jul 2024 – Aug 2024
Kistechno Software *Jaipur, Rajasthan*

- Designed and deployed a fully responsive portfolio website (HTML, CSS, vanilla JavaScript) with smooth scroll and CSS transitions; applied lazy loading and asset minification to improve Lighthouse scores.

Projects

AI Mock Interview Platform | *Next.js, React, TypeScript, Firebase, Gemini, Vapi AI* Jun 2025 – Jan 2026

- Architected an end-to-end AI interview platform (Vercel) that parses uploaded resumes (PDF/DOCX via Mammoth) and generates role-specific question sets via Google Gemini API — achieving sub-2s generation latency with ˜10 beta users.
- Engineered a real-time voice interview engine using Vapi AI for speech-to-text, conversational turn-taking, and automatic transcript capture — eliminating manual note-taking during practice sessions.
- Constructed an automated answer-evaluation pipeline with Gemini LLM that scores responses across 3 dimensions (relevance, structure, completeness) and surfaces per-dimension feedback on a user dashboard.
- Integrated Firebase Auth and Firestore to persist interview history, track weak areas across sessions, and render a performance analytics dashboard for returning users.

ConstiTUT | *Node.js, Express.js, MongoDB, Bcrypt, Nodemailer* Sep 2024 – Feb 2025

- Led backend architecture in a 3-person team — delivered a full-stack Indian Constitution learning platform (Vercel) featuring structured study content, video lessons, quizzes, crosswords, and gamified quest modules.
- Implemented authentication from scratch: bcrypt password hashing, express-session with MongoDB-backed session storage, and crypto-based password reset via Nodemailer — eliminating third-party auth dependencies.
- Designed a user engagement analytics pipeline in MongoDB — computed daily login streaks and rendered a GitHub-style activity heatmap — and secured backend APIs using Helmet, CORS, and express-rate-limit.

Leadership & Extracurricular

Coordinator, Science & Technology Club SKIT, Jaipur

- Organised 4+ technical workshops and events attended by 150+ students, including a department-level hackathon.
